Annual Refresher for Hazardous Waste Sites is an 8-hour course designed for private and public sector employees who work at sites covered by OSHA’s Hazardous Waste Operations and Emergency Response Final Rule (29 CFR 1910.120). This course requires that individuals have completed a 40-hour initial course as listed in 29 CFR 1910.120(2)(3). Group exercises, lectures, and a case study will provide students with real-life approaches to hazardous waste site operations.

At the completion of this course, participants should be able to:
• Identify and characterize physical, chemical, biological, and radiological hazards.
• Select and use proper personal protective equipment.
• Implement basic decontamination procedures.
• Develop site specific safety and health plans.
• Identify the components of medical monitoring program.

To register, visit osha.washington.edu, or contact us at 206-685-3089.

Registration is $205 per person, with discounts available for groups (2+) and government employees.
Annual Refresher
HAZARDOUS WASTE SITES

INTENDED AUDIENCE
This course is targeted towards industrial hygienists, environmental health professionals, and those responsible for worker safety and health at hazardous waste sites who have taken the basic 40-hour course.

ACCREDITATION
American Board of Industrial Hygiene Certification Maintenance can be obtained for this activity. See the ABIH website for CM credit criteria.

INSTRUCTORS

Rhett Carpenter, CHST is a graduate of Central Washington University with a degree in Occupational Safety & Health Management, and a minor in Risk and Environmental Management. Rhett is the owner of 'Safety, Health & Environmental Services LLC', and is also an instructor for the Pacific Northwest OSHA Education Center at the University of Washington. He is also an instructor for many associations and organizations throughout the Greater Puget Sound Region. Rhett is an authorized instructor through the Department of Ecology and regularly provides the Certified Erosion & Sediment Control training and consultation services, on a variety of levels, to many organizations.

Rick Gleason, CIH, CSP, CHMM, CET has served as the lead instructor for the Pacific Northwest OSHA Education Center since it's founding in 1995. Rick is also a lecturer in the University of Washington Department of Environmental and Occupational Health Sciences. The beloved "safety celebrity" is known throughout the Northwest for his excellence in teaching health and safety topics, and was recognized with the University of Washington Award of Excellence for Distinguished Contributions to Lifelong Learning in 2017. Prior to working for UW DEOHS, Rick was a Senior Safety and Health Specialist at Prezant Associates for 15 years, working as a consultant in workplace issues. He also worked for Federal OSHA as an inspector and consultant, and for the State of Washington, Department of Labor and Industries for 10 years.
