“Now is the perfect time for developing additional leadership skills. The assessments I took during the course allowed me to gain a 360° perspective and contrast how others saw me compared to how I viewed myself. Taking time to discuss with others and reflect upon the building blocks that got me where I am, allowed me to gain insights on what I may need and/or choose to work on to move forward. This has made me more intentional not only in my own professional development, but how I interact, motivate, and develop others.”

—Ann Lindsey, Transformational Leadership Academy development committee member and participant in pilot transformational leadership training
