Please join us in a Zoom virtual classroom to learn about root cause analysis systems for incident investigation. Professionals at all levels of experience will benefit from one or both of these interactive training opportunities.

**ROOT CAUSE ANALYSIS SYSTEM: The Basics**

January 27, 2021, 8:30am - 4:00pm

Standard Registration: $195

This course provides a basic introduction to the root cause analysis system for incident investigation. Course participants will leave with a basic understanding of the procedure for incident investigation, using root cause analysis and an introductory understanding of appropriate preventive measures or corrective actions. Health and safety professionals, and workers with an interest in safety and accident investigation should attend.

**ROOT CAUSE ANALYSIS SYSTEM: for Leaders**

February 10-11, 2021, 8:30am - 4:00pm

Standard Registration: $390

This course provides a detailed description of a root cause analysis system for incident investigation. Course participants will leave with data collection and analysis skills that will equip them to lead incident investigations using root cause analysis, and to implement appropriate corrective actions. Health and safety professionals, and any workers in a safety leadership role, should attend.
