EMERGENCY SAFETY OFFICER TRAINING

COURSE DESCRIPTION
This course will familiarize attendees with hazards and stressors that may impact the health and safety of workers and responders at a disaster site. Students will apply their knowledge of safety and incident command in a disaster scenario and employ Incident Command System methodology to review and/or develop safety and medical plans, safety messages, and a safety analysis of an Incident Action Plan.

WHAT YOU WILL LEARN
Students who complete this course will be able to:
• Effectively integrate safety planning into the Incident Command System
• Address hazards and evaluate risks associated with a disaster site beyond the day-to-day work environment
• Identify and triage controls for hazards in a resource constrained environment
• Understand and respond to psychosocial impacts of working in a high stress disaster environment

LOCATION
UW Roosevelt Training Center
4225 Roosevelt Way NE, Seattle, WA 98105

REGISTRATION
Standard Registration: $710
Government Rate: $660
To register, please visit osha.washington.edu or call 206-685-3089.
Group and student discounts are available, please see our website for details.

UPCOMING DATES
November 27-29, 2017
June 25-27, 2018
November 19-21, 2018

See reverse side for more information.
INTENDED AUDIENCE

- Personnel who serve as command, safety officers, assistant safety officers, or other safety-relevant roles in an Incident Command System (ICS)
- Emergency responders who may fulfill the role of a safety officer, assistant safety officer, or technical safety staff in an Incident Command System
- Emergency managers and planners
- Industrial hygiene and safety professionals from general industry, construction, maritime, and other industries who have assigned responsibilities in an emergency response

PREREQUISITES

This course has OSHA and FEMA training prerequisites. Please visit osha.washington.edu or contact us at 206-685-3089 for list of prerequisites.

INSTRUCTORS

Nicole Errett, PhD, MSPH
Faculty Lecturer, University of Washington Dept. of Environmental and Occupational Health Sciences (UW DEOHS)
Nicole Errett has nearly a decade of practical experience in emergency management and public health preparedness at the federal, state, and local levels. Her research interests and expertise are in the use of public policy to enhance health outcomes during and after disaster.

Dana Stahl, CIH
Development Manager and Instructor, Pacific Northwest OSHA Education Center, UW DEOHS
Dana Stahl has more than 20 years of experience managing occupational health and safety programs for public agencies, including the Port of Seattle and Sound Transit, and several manufacturing companies. She has managed industrial hygiene and hazardous materials management programs throughout her career and worked closely with local emergency managers and emergency responders, while managing the emergency management program at Sound Transit.
