Occupational and environmental health exposures cause thousands of illnesses and injuries each year.

This lecture series addresses the evaluation, treatment, and prevention of disease and injuries related to environmental and occupational exposures encountered by physicians and their colleagues in local, regional, and international settings.

At this venue for education and professional networking, join us as we explore:

* Current issues and emerging trends in occupational and environmental medicine
* Practical applications of new scientific discoveries
* Best practices in occupational and environmental medicine

Speaker Bio
Dr. Robert Harrison joined UCSF in 1984. He founded and has directed UCSF Occupational Health Services for more than 15 years, and is now a senior attending physician. He has diagnosed and treated over 10,000 patients with work- and environmental-induced diseases and injuries. He also directs the worker tracking investigation program for the California Department of Public Health.
